

ABSTRACT

WA-IV-095

MASON-DIXON LINE: MILESTONE NO. 95(98)

1767 (reset 1902)

Ringgold, Maryland vicinity

Public/private

Milestone No. 95(98) marks Mason and Dixon's 95th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. It is an original crownstone of 1767, quarried and carved in England, of oolitic limestone, still in good condition, unaltered, and at its original site, preliminarily surveyed in 1765, set two years later, then reset more securely in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It now stands about 1½ feet above ground; measures about 12 inches on the north and south sides, about 11 inches on the east and west sides; is quite weathered on the top and north side; chipped along all edges and top corners; splotchy on all surfaces from lichen; and with two grooves in the top east plane. The distinguishing embellishments otherwise remain quite clear and essentially intact: vertical fluting with horizontally-fluted margins on all four sides; and the stylized shield of the Penns on the north side facing Pennsylvania and that of the Calverts on the south side facing Maryland, both carved near the top. On the national and state levels, No. 95(98) is significant primarily as one of 135 original monuments in the thematic group series of some 248 markers still defining the West Line. Locally as one of 48 original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 milestones), it is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. 95(98) marks Mason and Dixon's 95th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. It is an original crownstone of 1767, in good condition, unaltered, and remains at its original site, although reset more securely in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary.

The area here is rural, gently rolling, with only a very few scattered farms and several orchards, nearly all open lands except for strands of woods following the East Branch of Antietam Creek to the north. The site is within Election District 9 of Washington County, MD, and Washington Township of Franklin County, PA; about a mile northwest of the small settlement of Ringgold, MD; about 2 miles south of the center of the town of Waynesboro, PA; about 2000 feet south of Goods Dam Road, (on south side of) in a scraggly multifloral fencerow/protecting the monument and separating the Shriver farm on the north from the Miller farm on the south; about 300 feet south of the Shriver's old brick home and stone dairy(now house). The crownstone cannot be seen from any road or the houses, and is difficult to spot from closeby even when vegetation is dormant.

The crownstone, as with all original Mason and Dixon West Line monuments, was quarried and carved in England, of oolitic limestone, and initially measured about 12" square by about 4½ feet long with a low pyramidal top, cut to stand as a post about 3 feet above ground, with the base left rough-cut for setting into the ground. The distinguishing embellishments are the vertical fluting with horizontally-fluted margins on all four sides, and the stylized shields of the Penn coat of arms on the north side facing Pennsylvania and that of the Calvert's on the south side facing Maryland, carved near the top. Reset in 1902 to presumably about its present height of 1½ feet above ground, it still measures about 12 inches on the north and south sides, but is about 11 inches on the east and west sides. Although there is considerable weathering of the top and north side, the shields are still quite distinct and intact; most fluting and some of the margins remain; there are chips along the edges and top corners (particularly the top northwest corner); fluting on the top planes has disappeared and there are 2 grooves cut into the east top plane. (see Thematic Group National Register nomination form for full descriptions of

~~BOUNDARY SURVEYORS~~ Charles Mason and Jeremiah Dixon**STATEMENT OF SIGNIFICANCE**

Milestone No. 95(98), a crownstone of 1767, is significant on the national and state levels primarily as one of a series of 135 original Mason and Dixon monuments still defining their 230.228-mile West Line, the boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The site was preliminarily surveyed in 1765 and crownstone set two years later, where it remains in place, although reset more securely in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 48 original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 milestones), No. 95(98) is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.
